

The Practical Fundamentals of Musculoskeletal Ultrasound

Evaluation of Basic Anatomy for Elbow

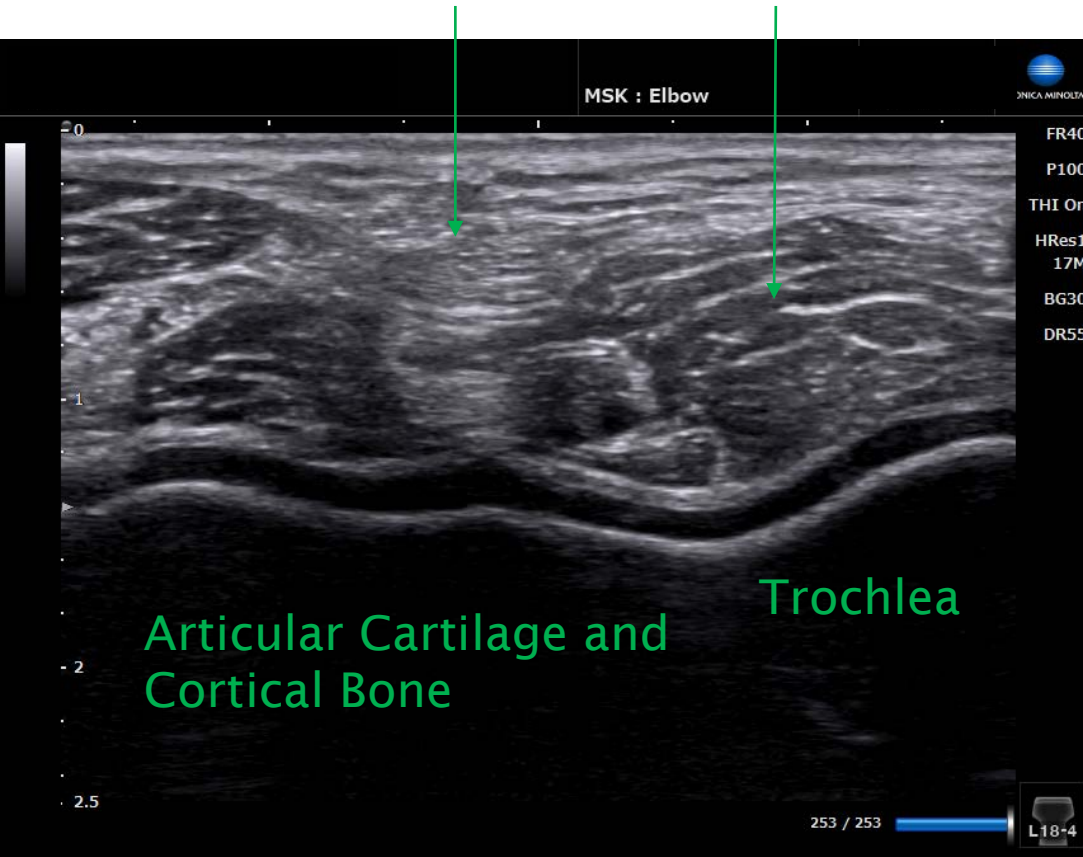

Scanning protocol for elbow

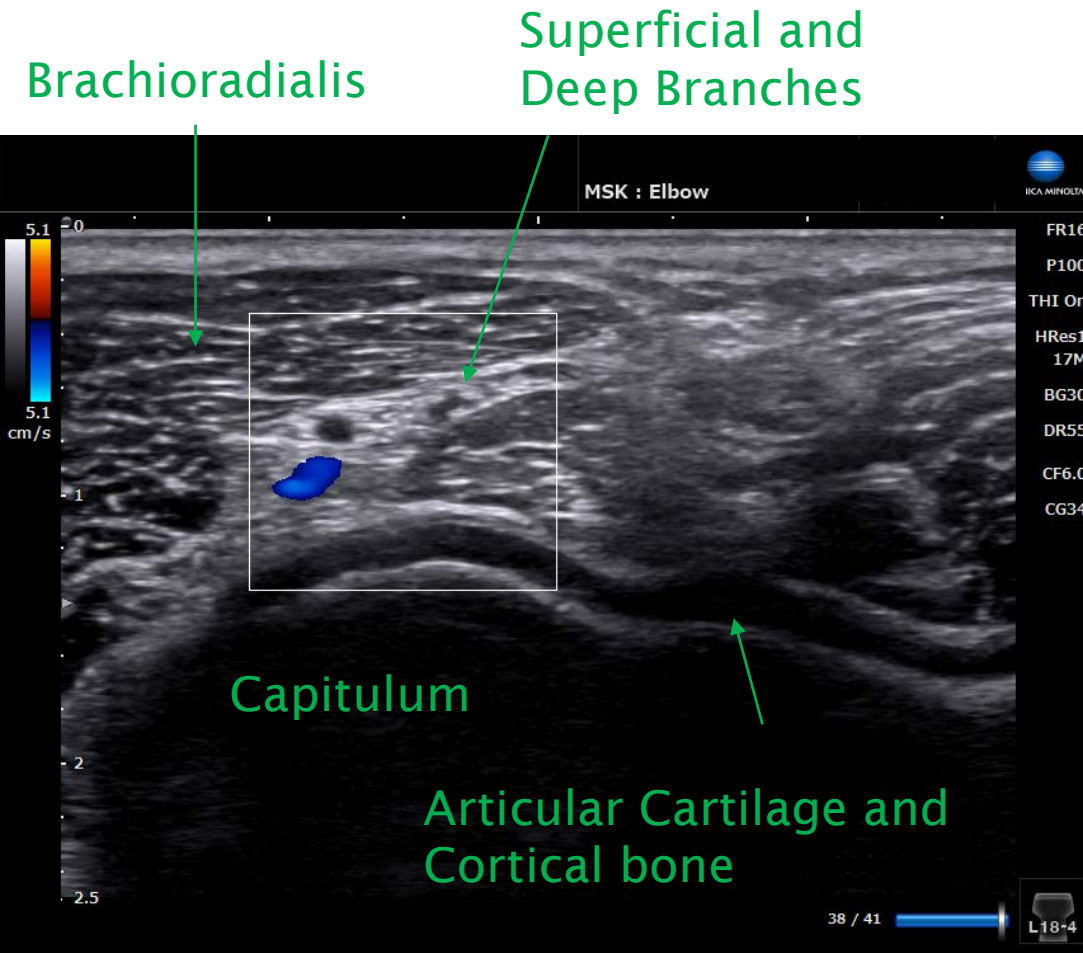

- **Biceps brachii tendon**
- **Brachialis muscle**
- **Radial nerves, brachioradialis**
- **Median nerve and pronator teres**
- **Anterior joint long axis**
- **Common flexor tendons**
- **Ulnar nerve**
- **Common extensor tendons**
- **Triceps brachii**

Anterior: Brachialis, biceps tendon, and joint

Biceps Brachii Tendon Brachialis Muscle

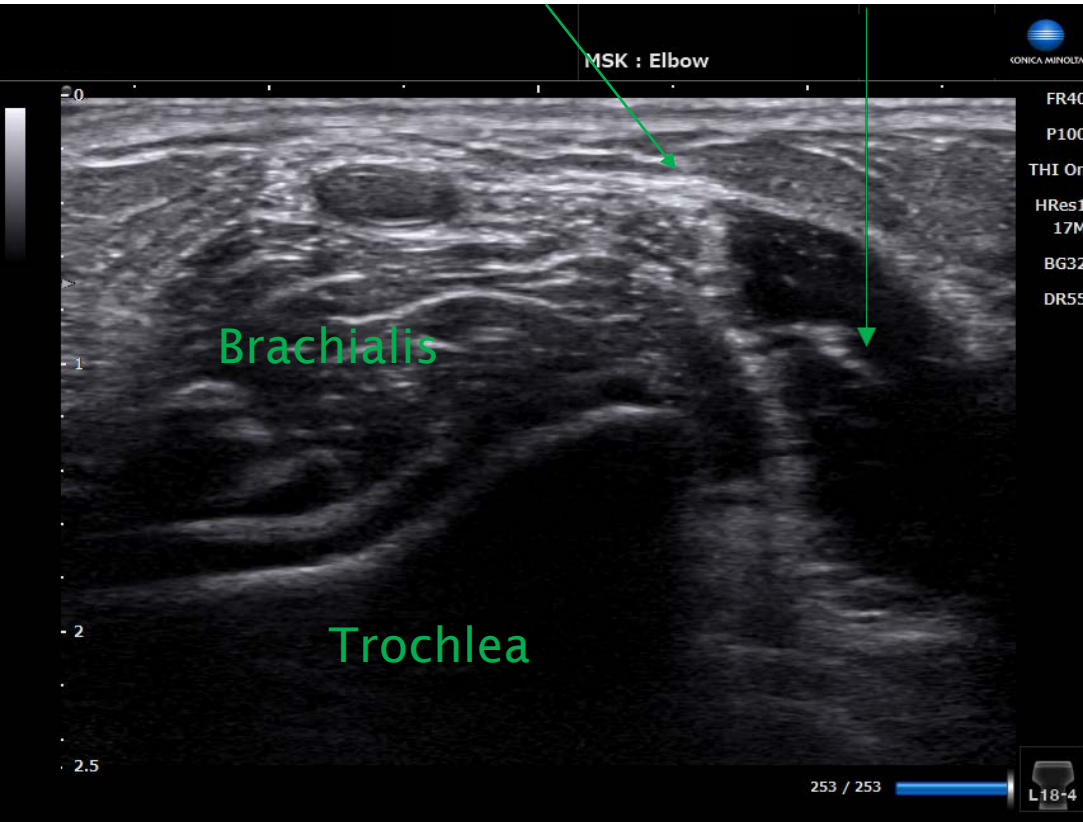

Anterior: Radial nerves, brachioradialis

Anterior: Median nerve and pronator teres

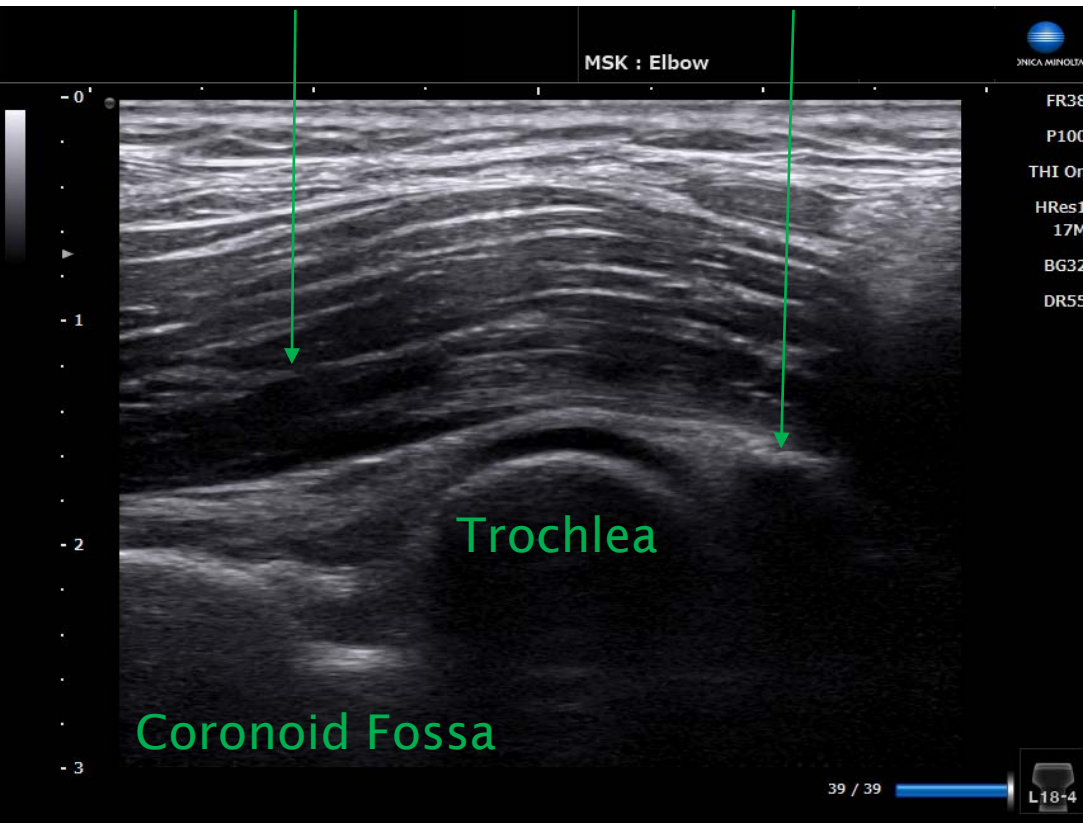

Median Nerve Pronator Teres

Anterior: Ulnar – long axis

Brachialis

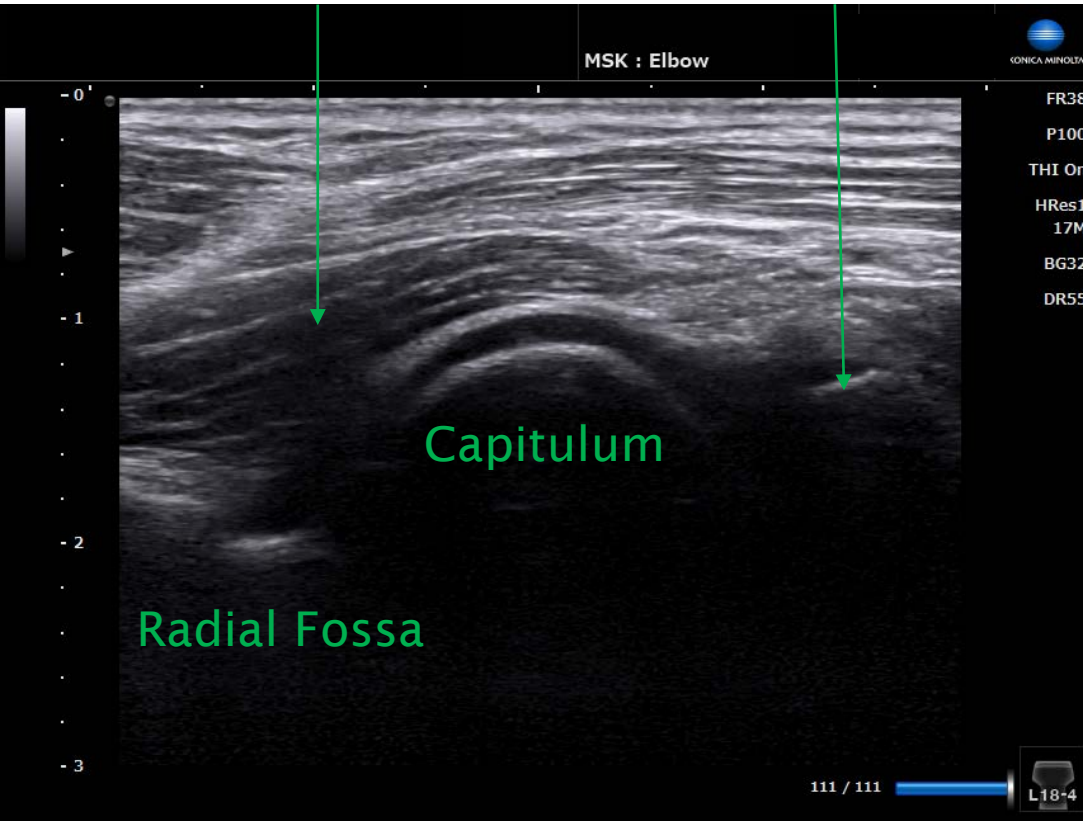

Coronoid Process

Anterior: Radial – long axis

Brachialis

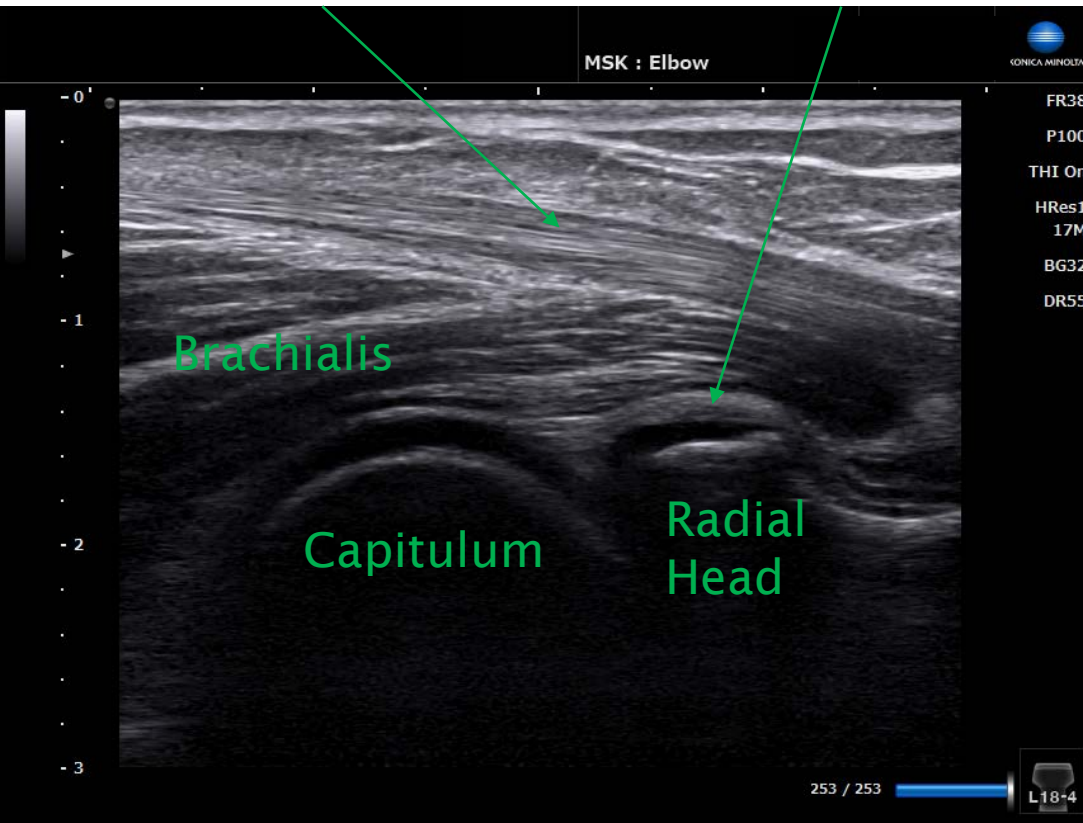

Radial Head

Anterior: Biceps tendon – long axis

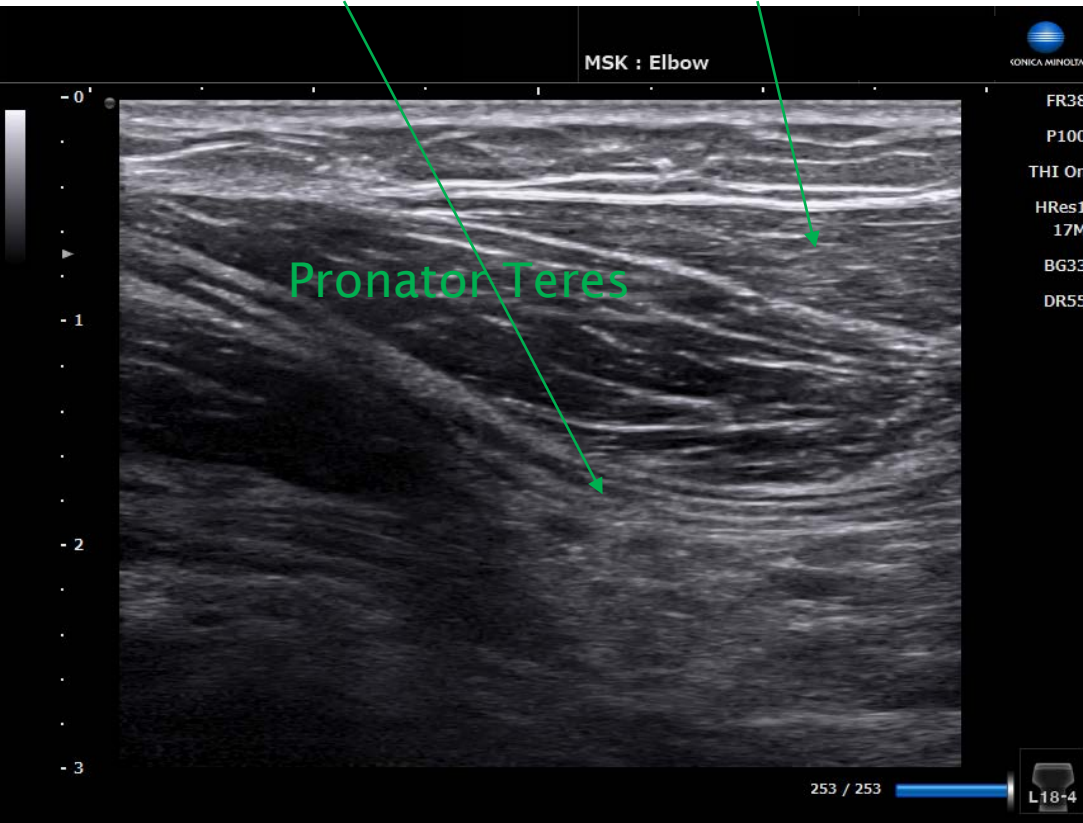

Biceps Tendon

Annular Ligament

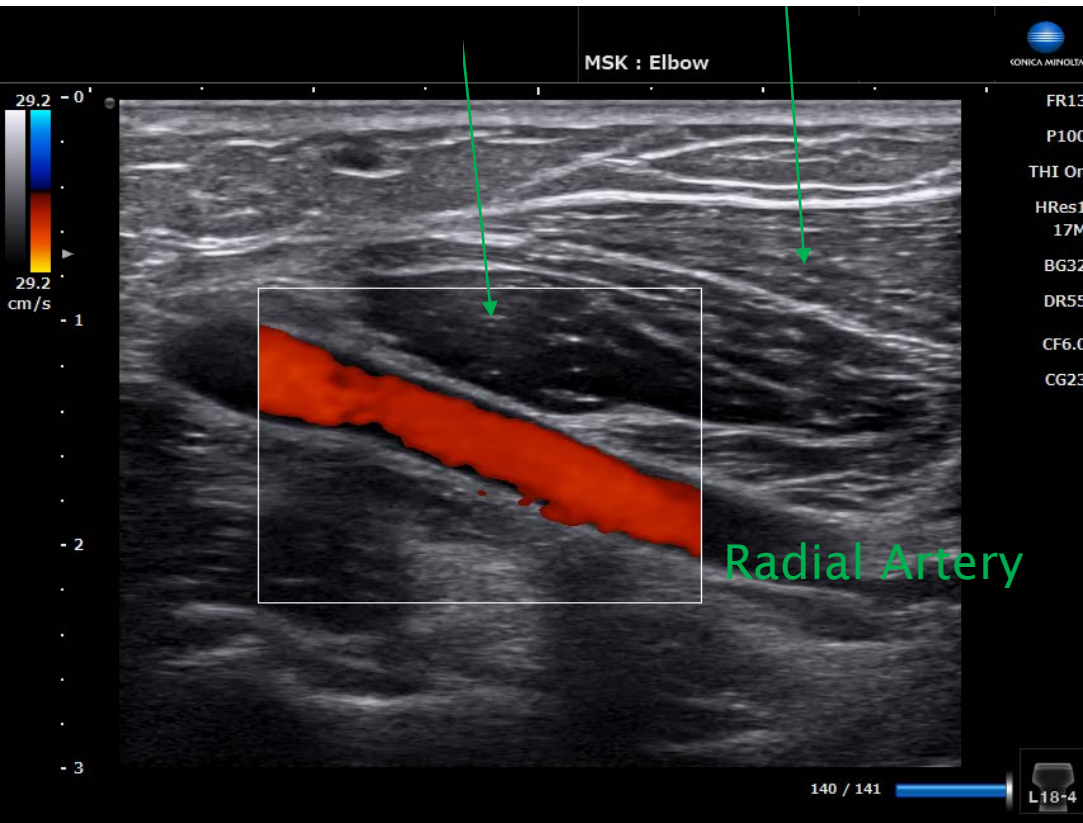

Anterior: Median nerve – long axis

Median Nerve Flexor Carpi Radialis

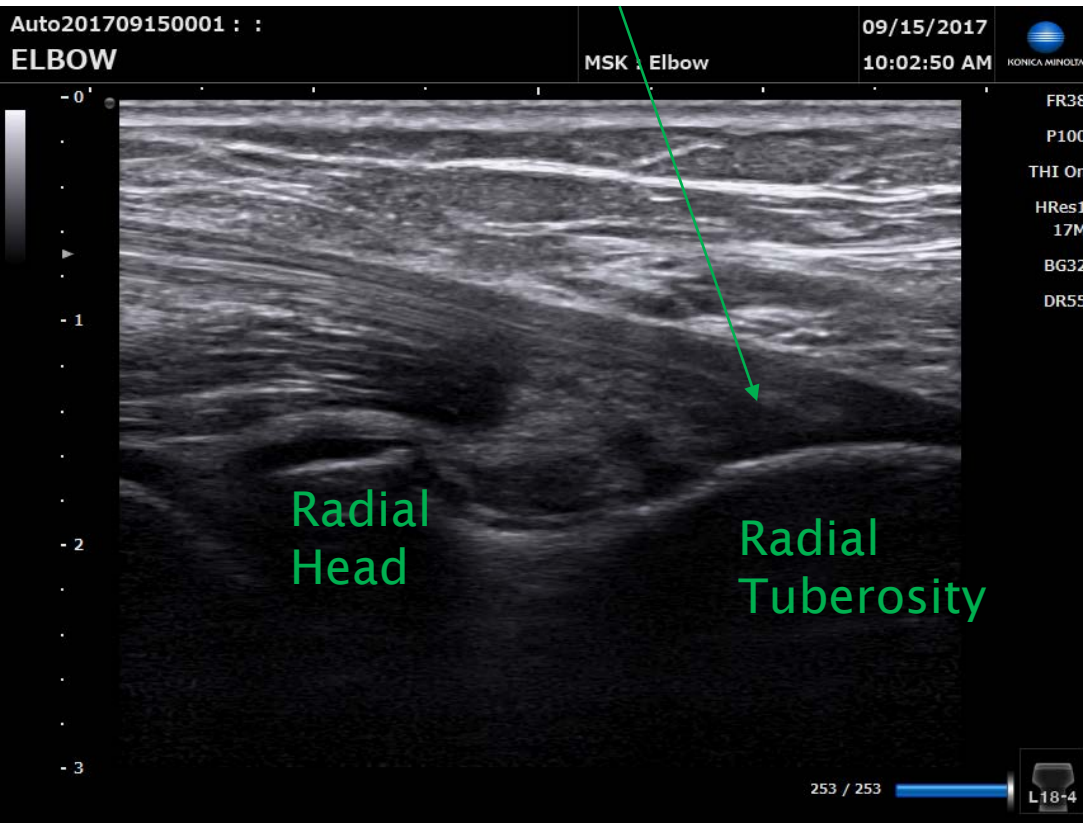

Anterior: Radial artery – long axis

Pronator Teres Flexor Carpi Radialis

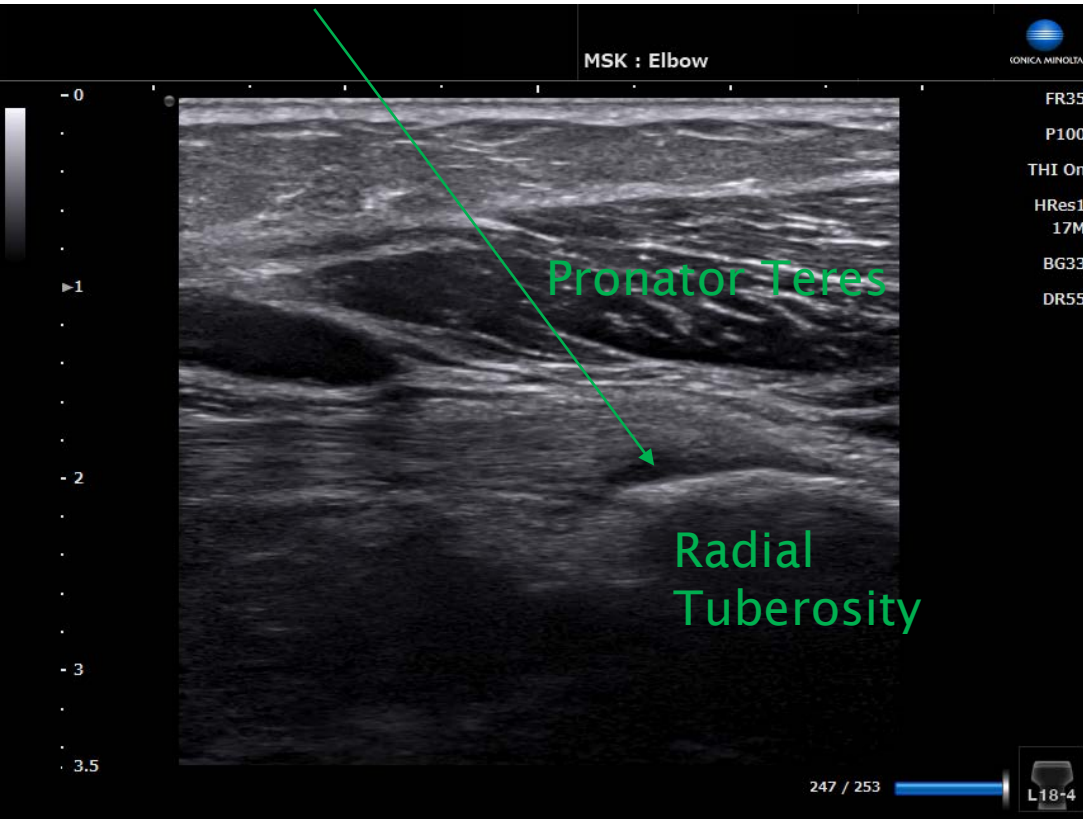

Anterior: Biceps tendon – long axis

Biceps Tendon Insertion at Radial Tuberosity

Anterior: Biceps tendon insertion is lateral to artery – long axis

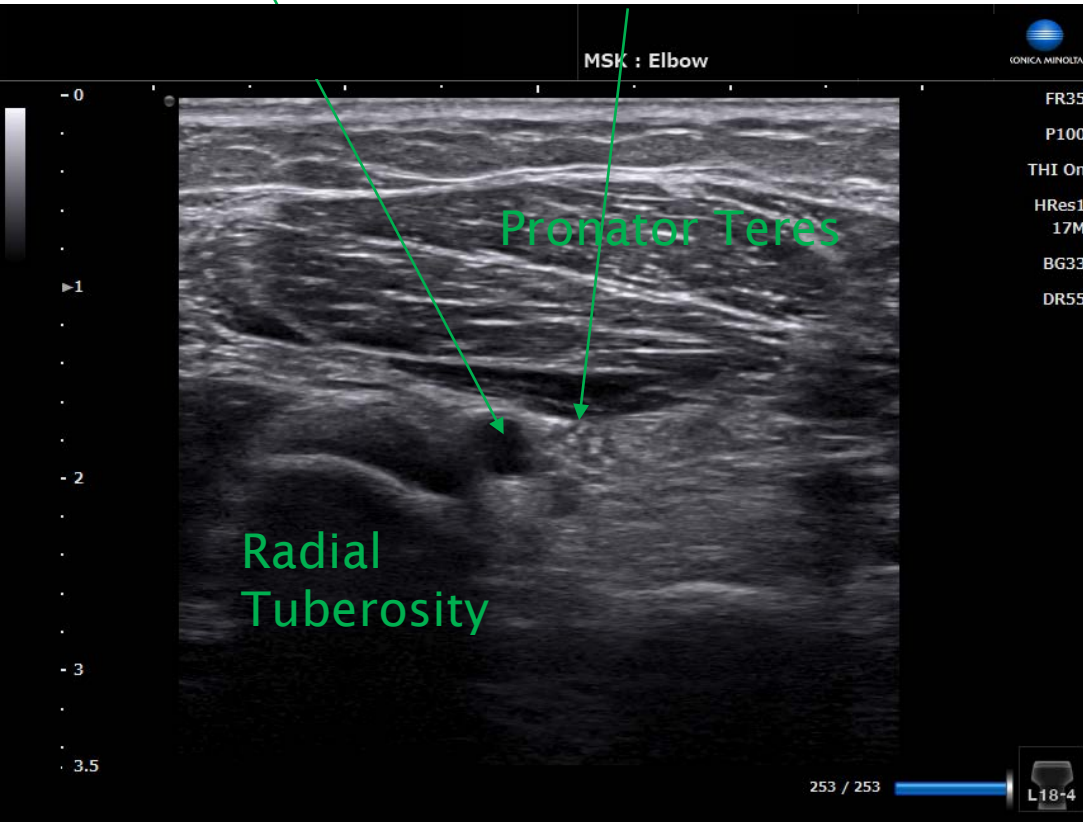

Biceps Tendon Insertion at Radial Tuberosity

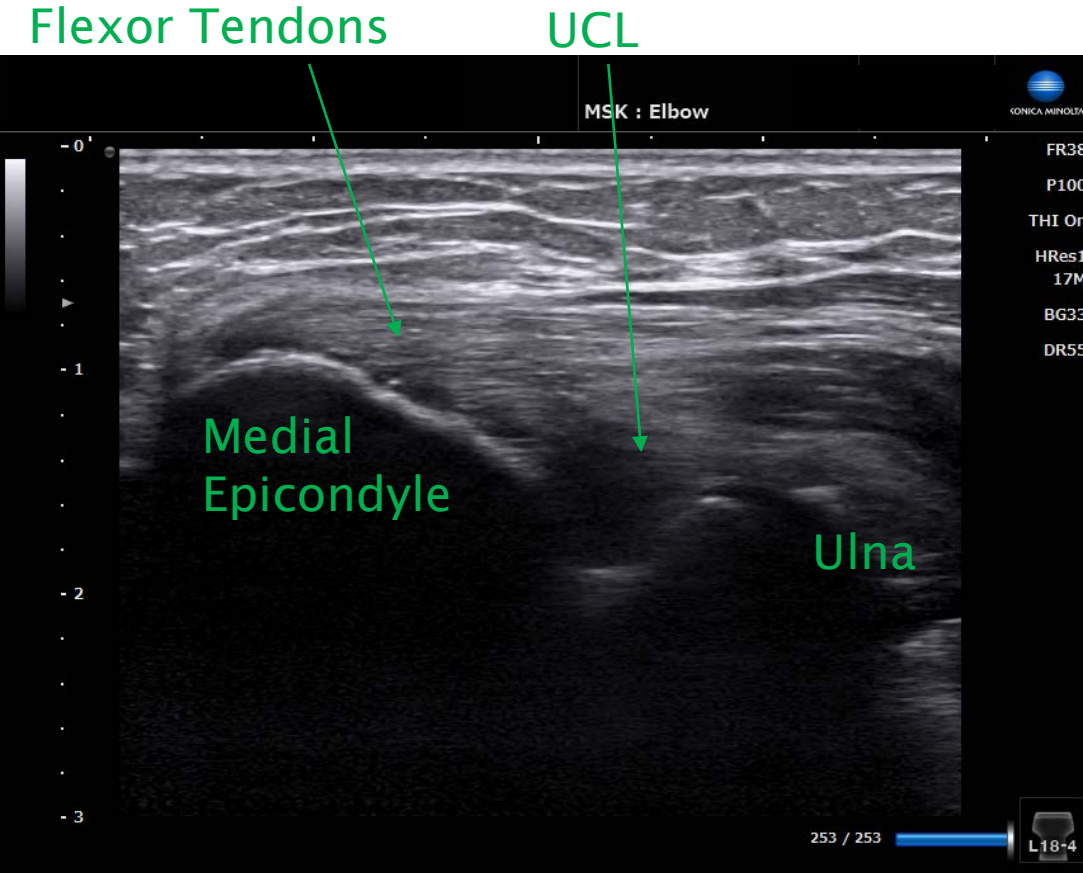

Anterior: Biceps tendon insertion is lateral to artery – short axis

Radial Artery

Median Nerve

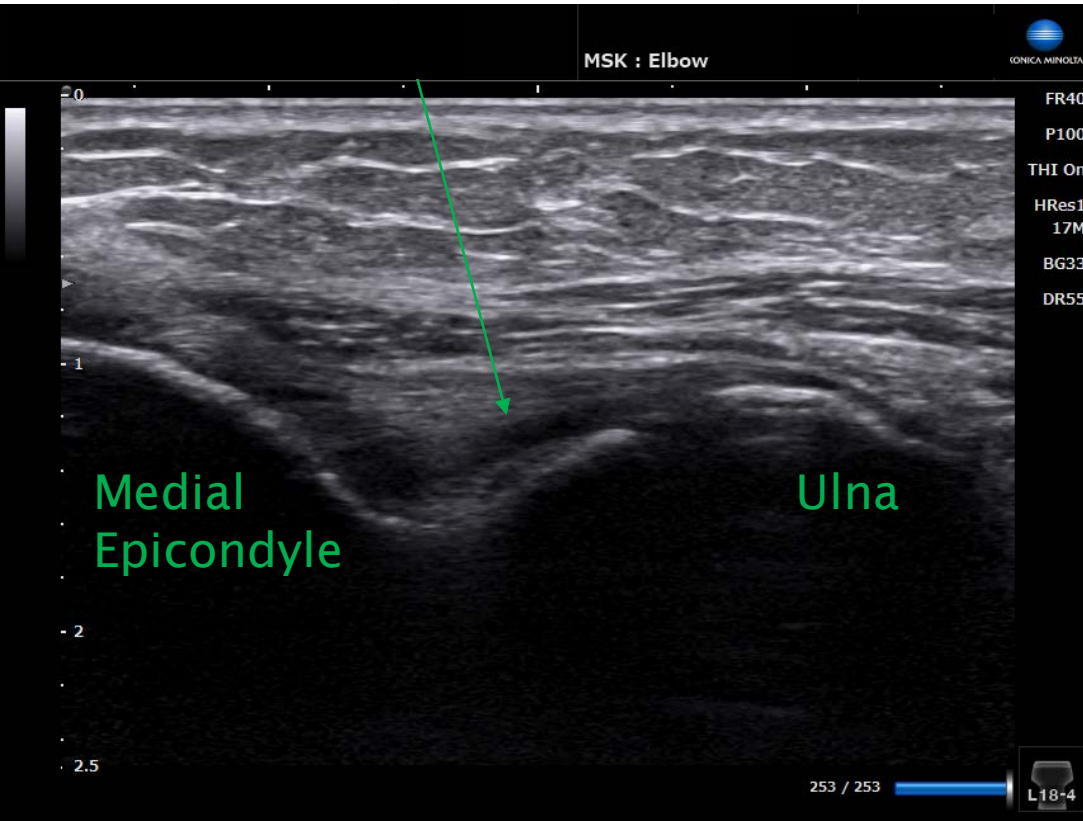

Medial: Common flexor tendons – long axis

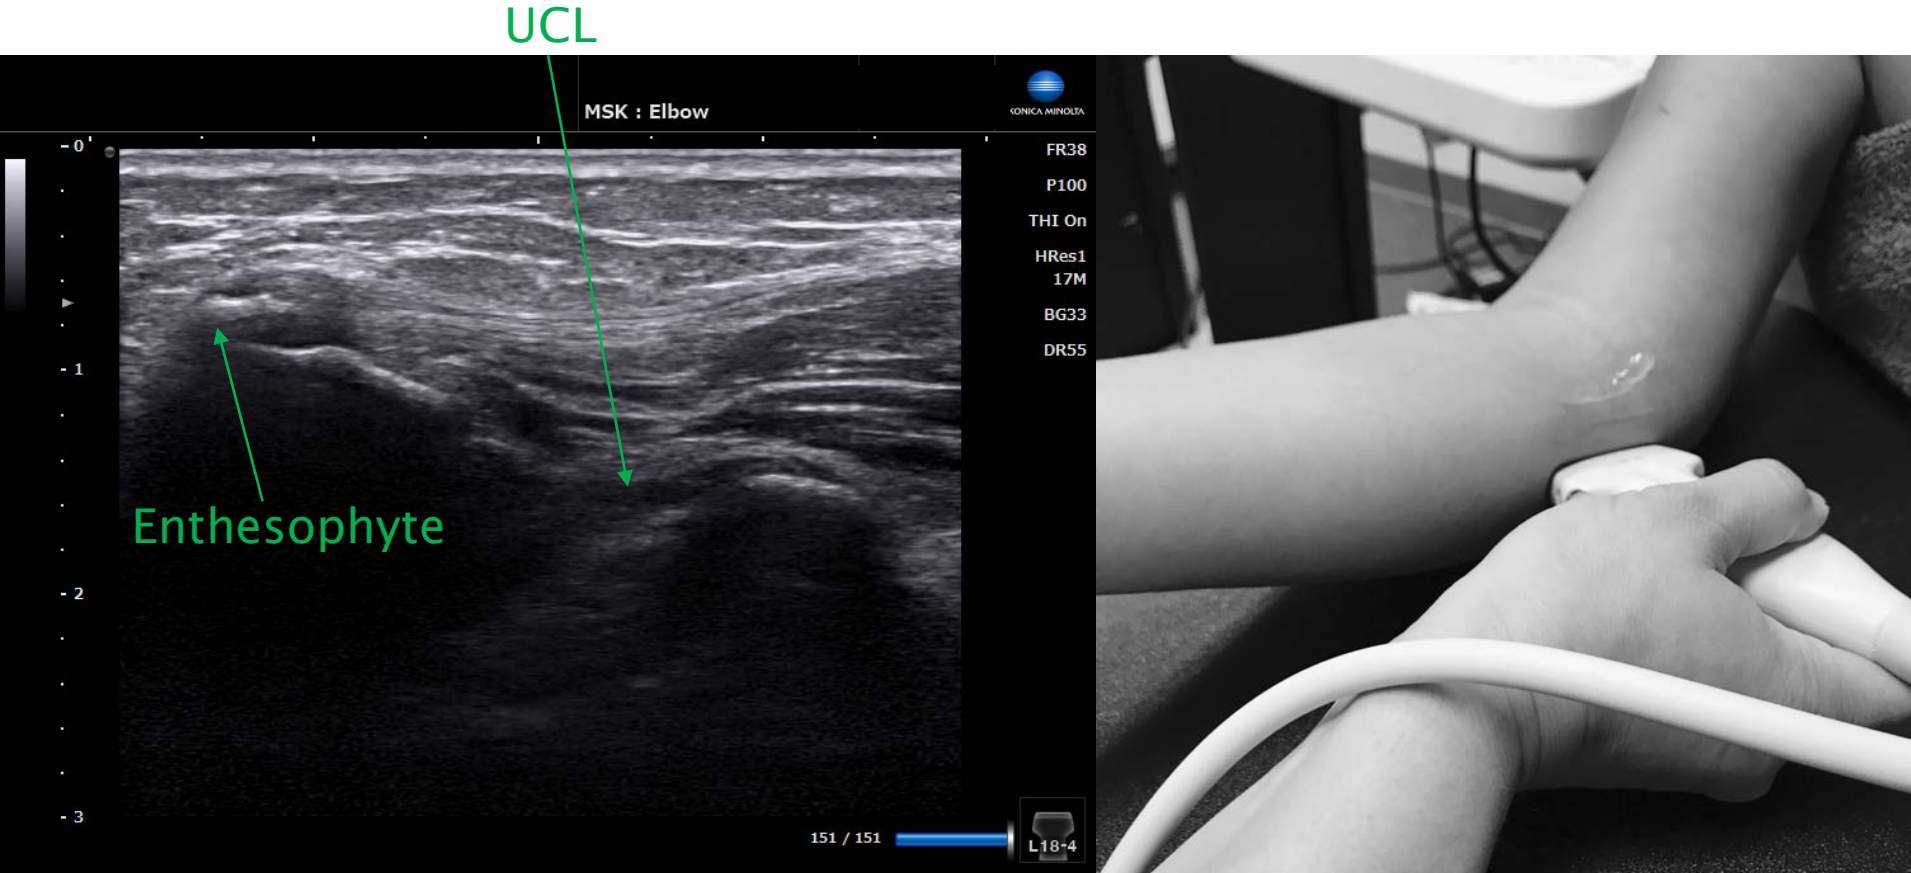

Medial: Ulnar collateral ligament – long axis

UCL

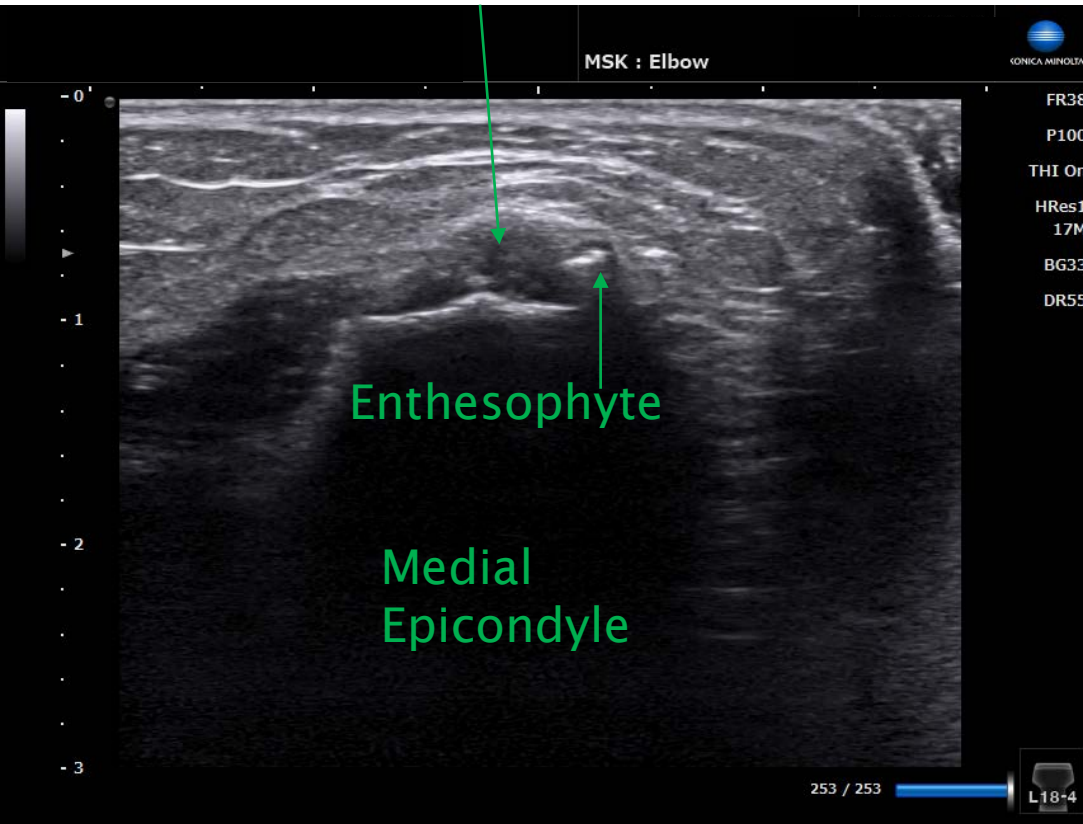

Medial: Common flexor tendons long axis

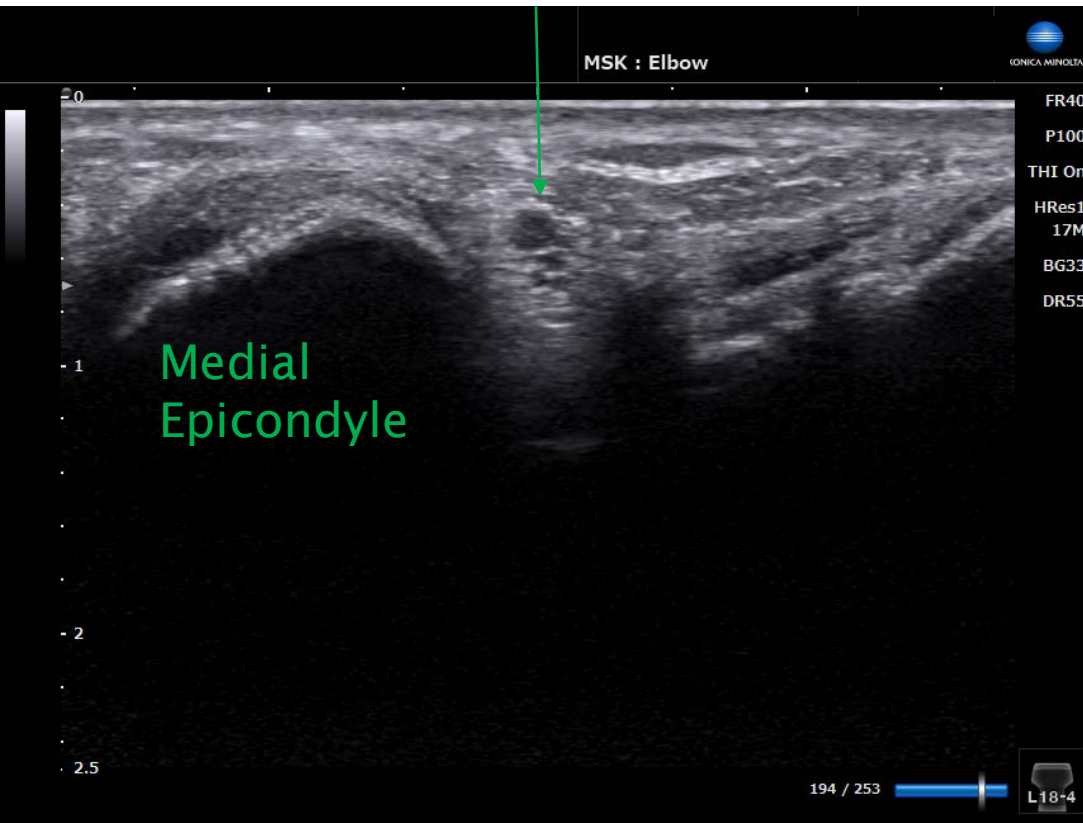

Medial: Common flexor tendons short axis

Flexor Tendons

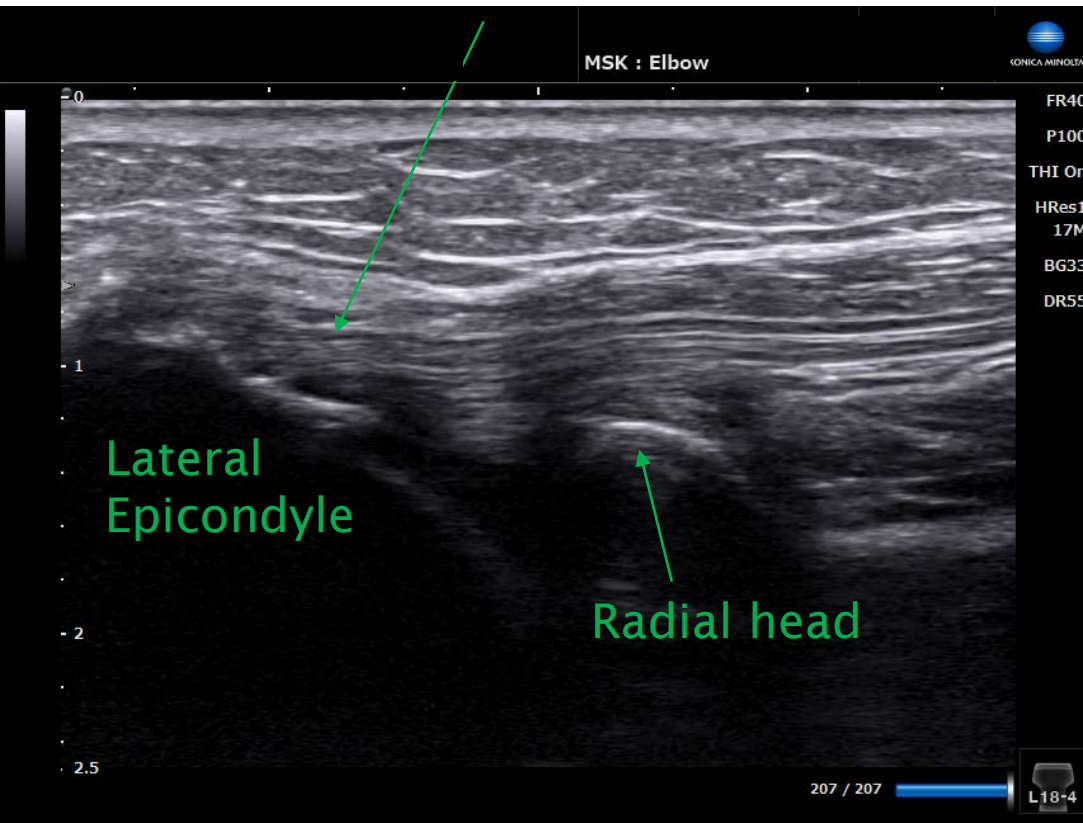

Medial: Ulnar nerve short axis

Ulnar Nerve in Cubital Tunnel

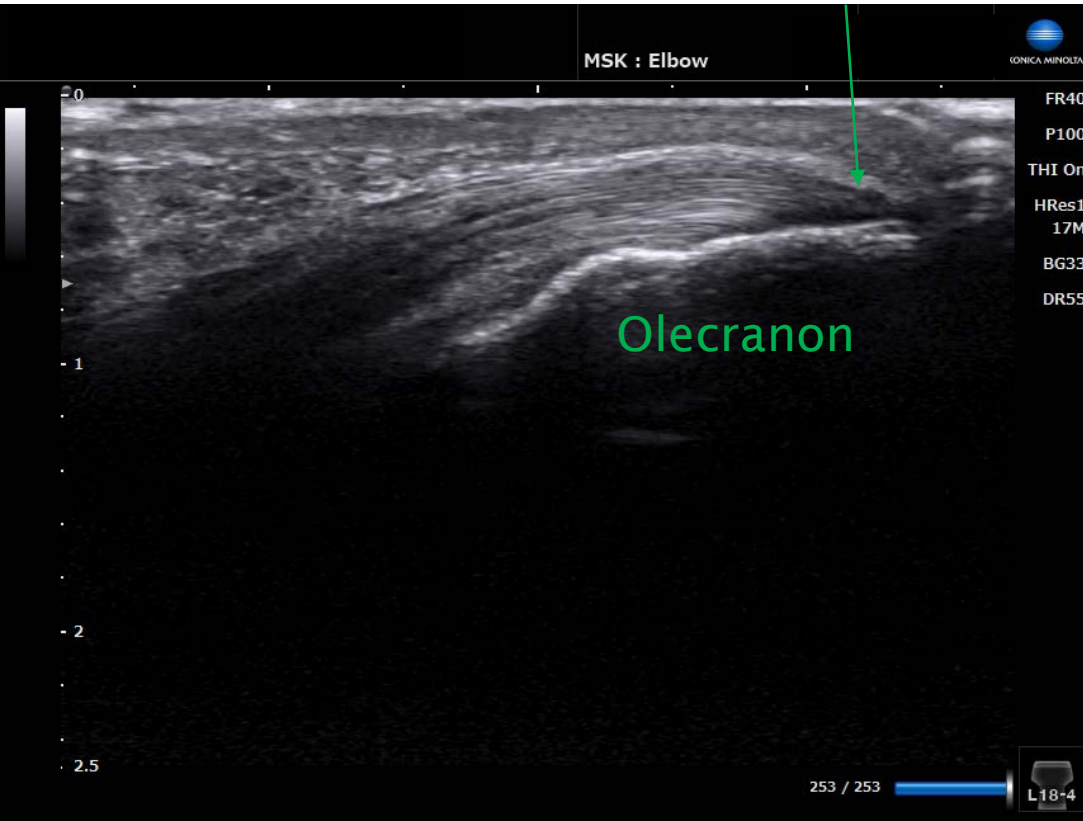

Lateral: Common extensor tendons – long axis

Extensor Carpi Radialis Brevis

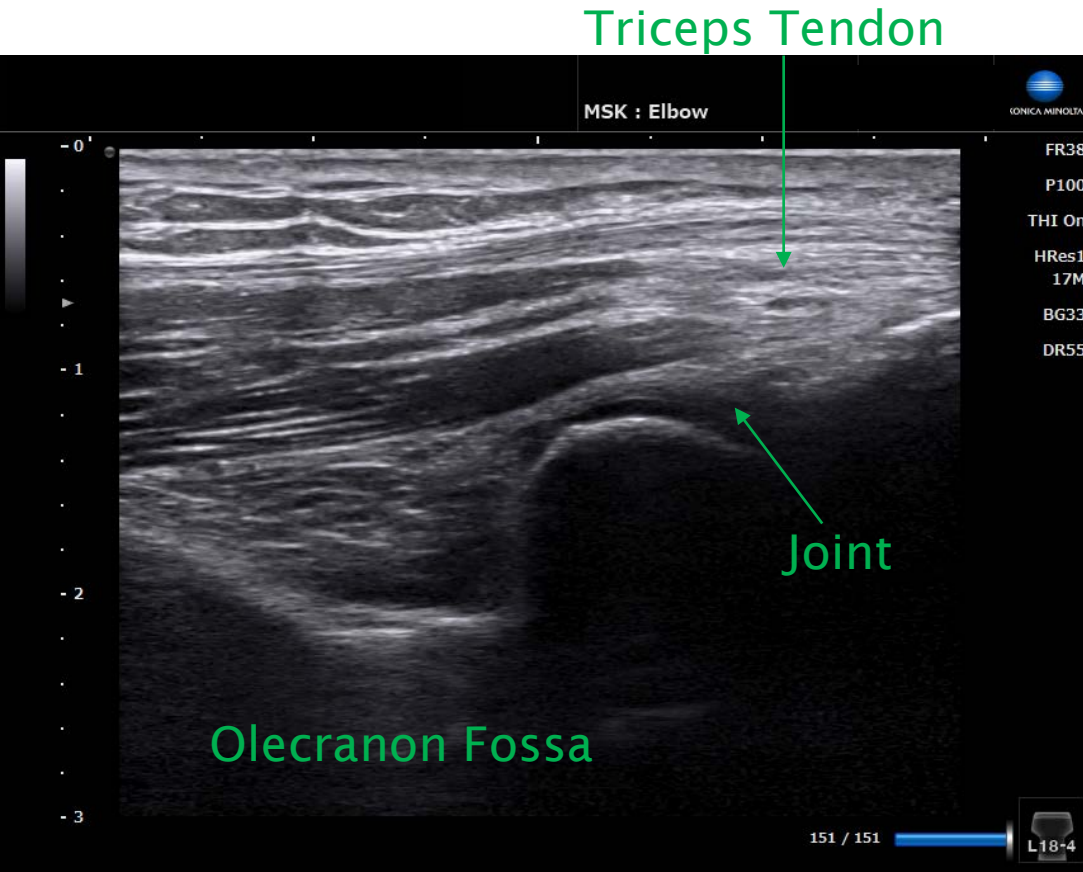

Posterior: Triceps brachii tendon – long axis

Float the transducer to evaluate point of insertion

Posterior: Triceps brachii tendon – long axis
