

The Practical Fundamentals of Musculoskeletal Ultrasound

Evaluation of Basic Anatomy for Knee

Scanning protocol

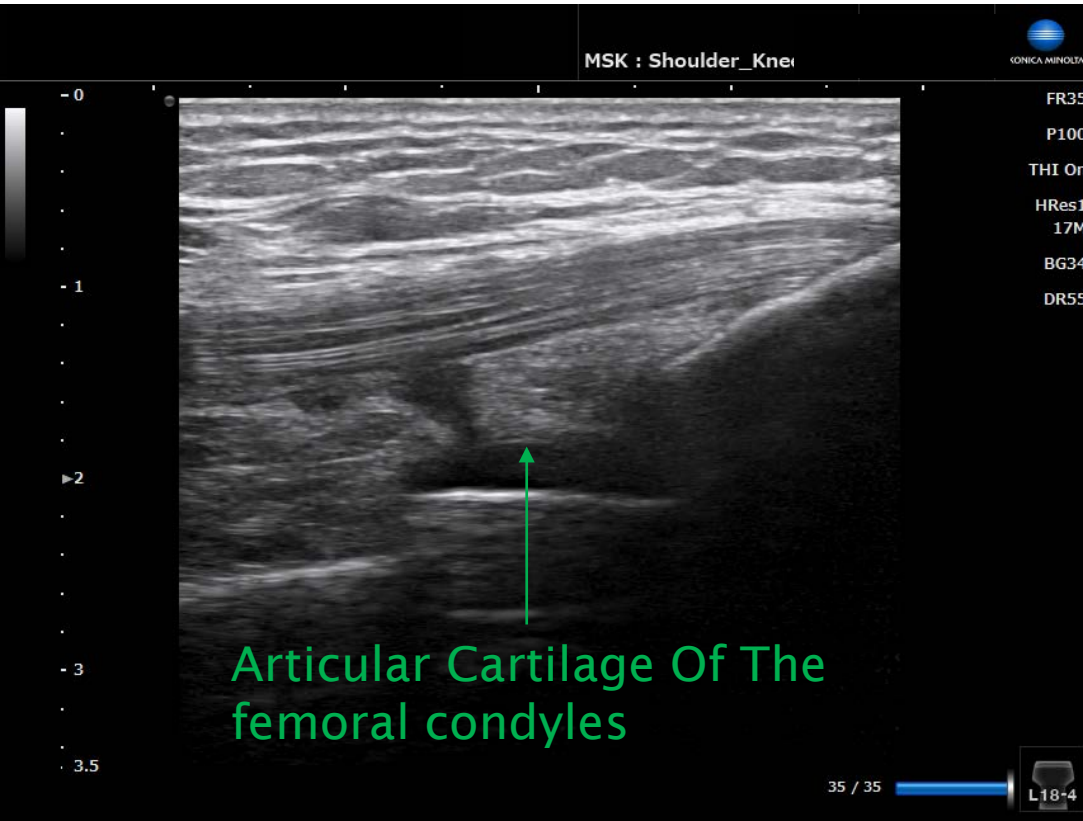

- Quadriceps tendon
- Suprapatellar pouch
- Articular surface
- Patellar tendon
- Iliotibial track
- Medial collateral ligament
- Medial meniscus
- Pes anserine
- Fibular collateral ligament
- Popliteus
- Biceps femoris long head
- Semimembranosus
- Semitendinosus
- Gastrocnemius medial head
- Posterior cruciate ligament
-

Anterior: Quadriceps tendon flexed to 30° long axis

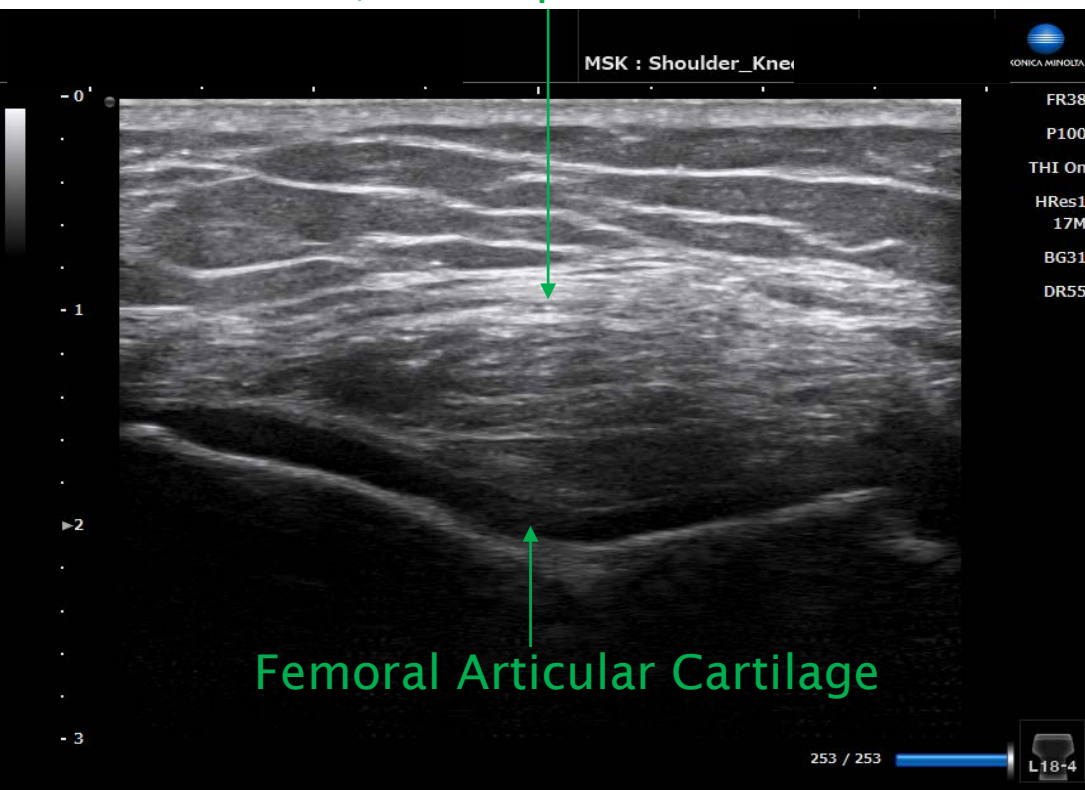

Suprapatellar Pouch

Quadriceps Tendon

Anterior: Quadriceps tendon flexed to 30° short axis

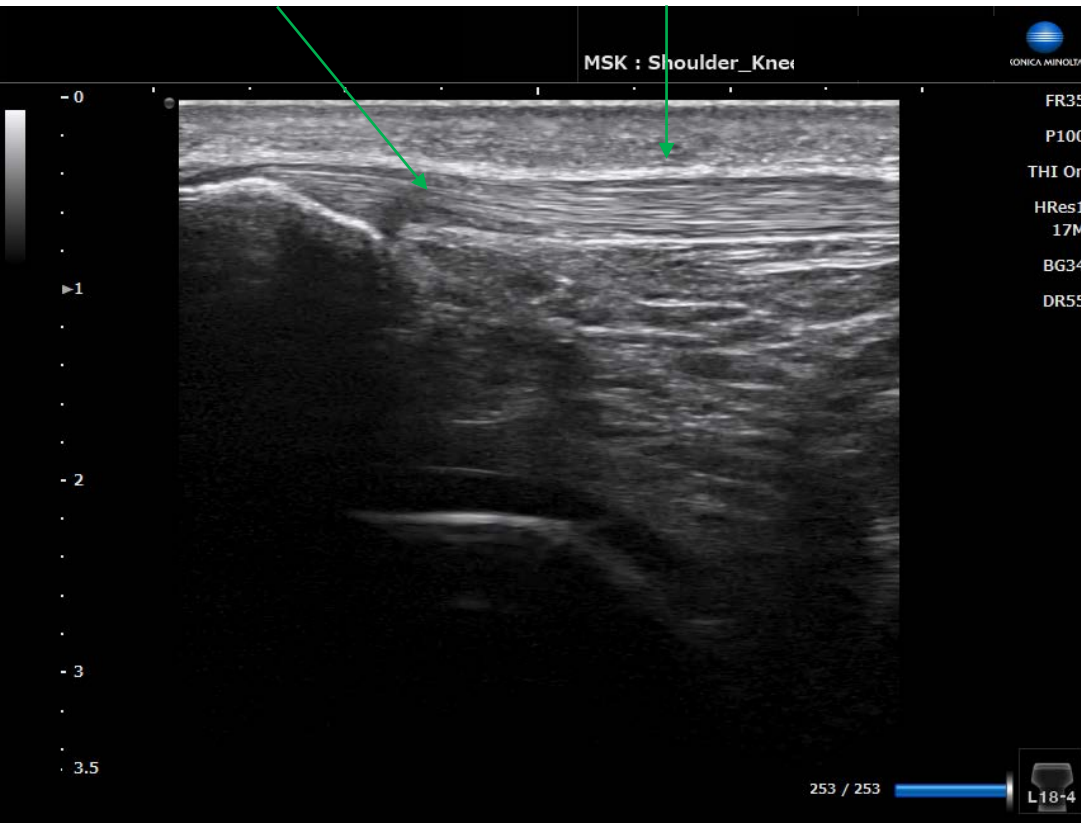

Quadriceps Tendon

Anterior: Patellar ligament proximal

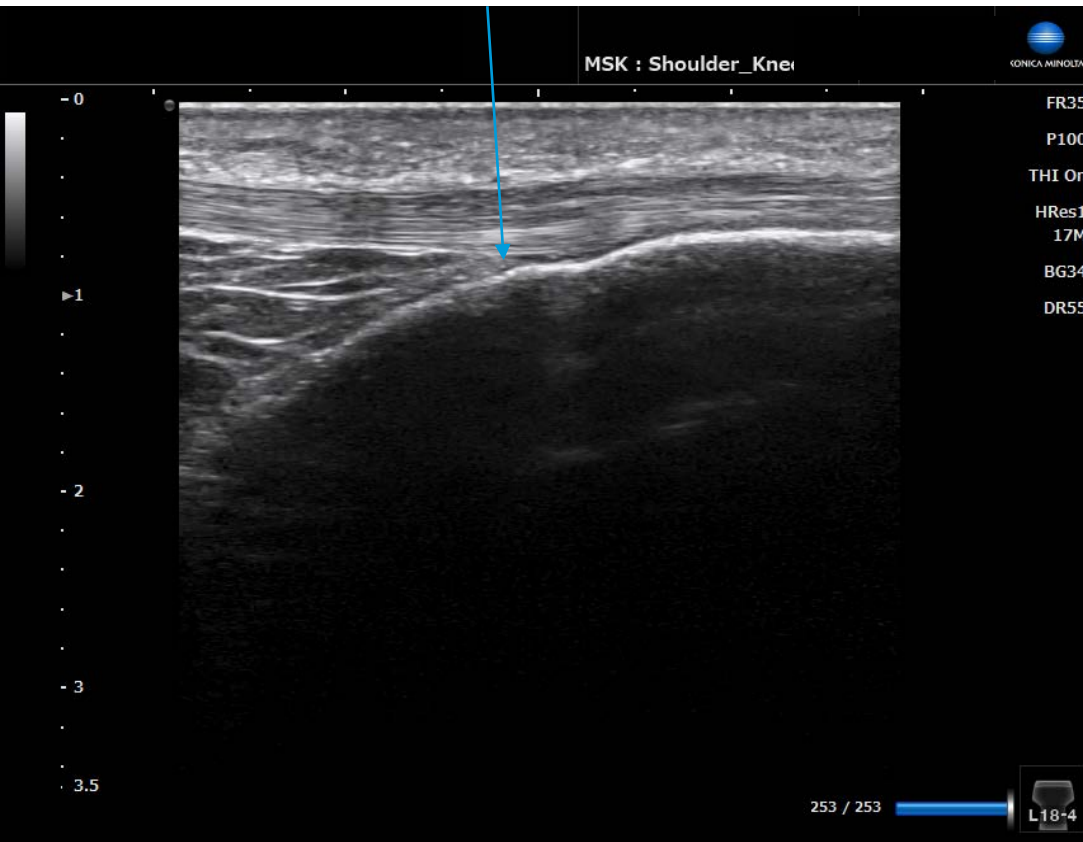

Patellar Ligament Prepatellar and Superficial Bursa

Anterior: Patellar ligament distal

Infrapatellar Bursa

Medial: Medial collateral ligament (MCL)

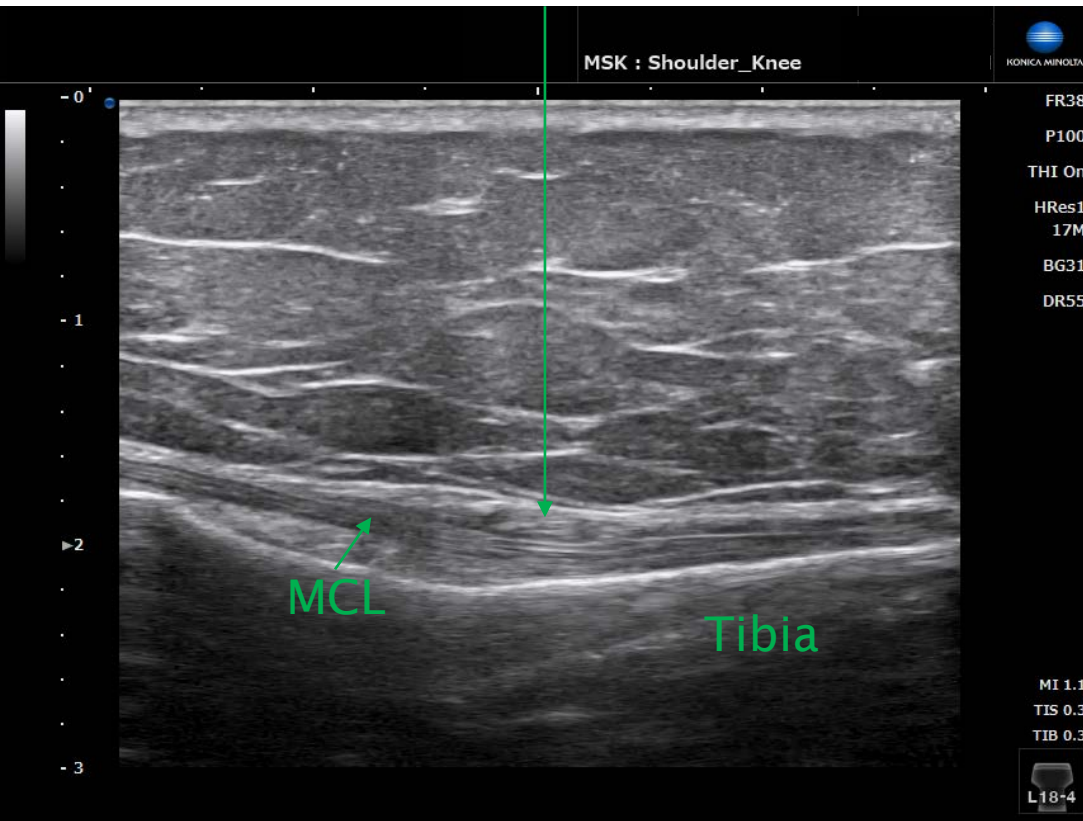

Medial Collateral Ligament

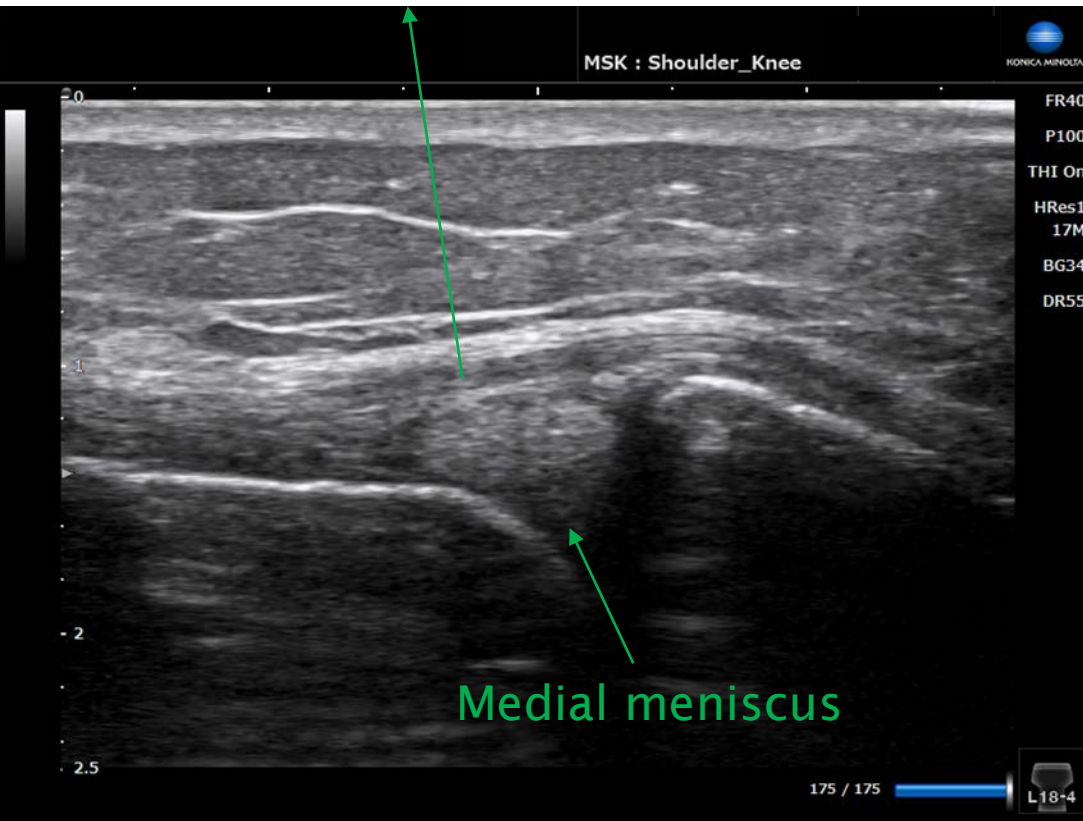

Medial: Medial collateral ligament, pes anserine tendons and bursal space

Pes Anserine Tendons and Bursal Space

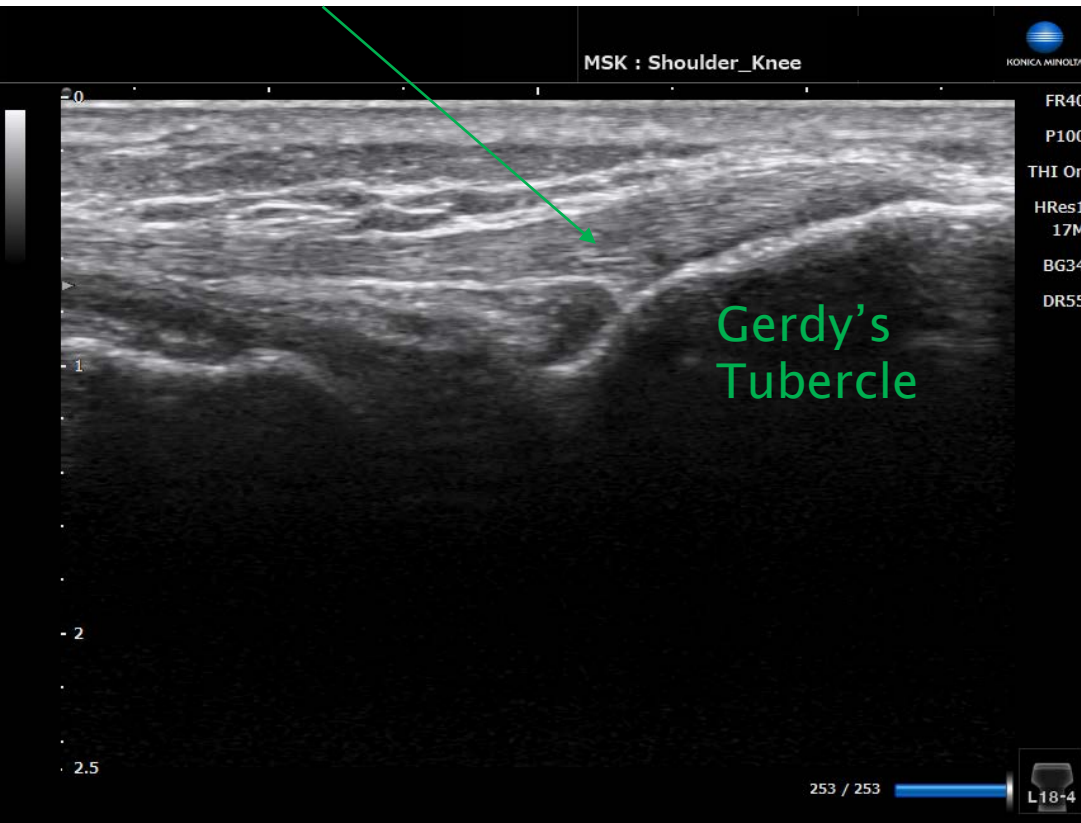

Medial: Medial meniscus mid horn

Medial Collateral Ligament

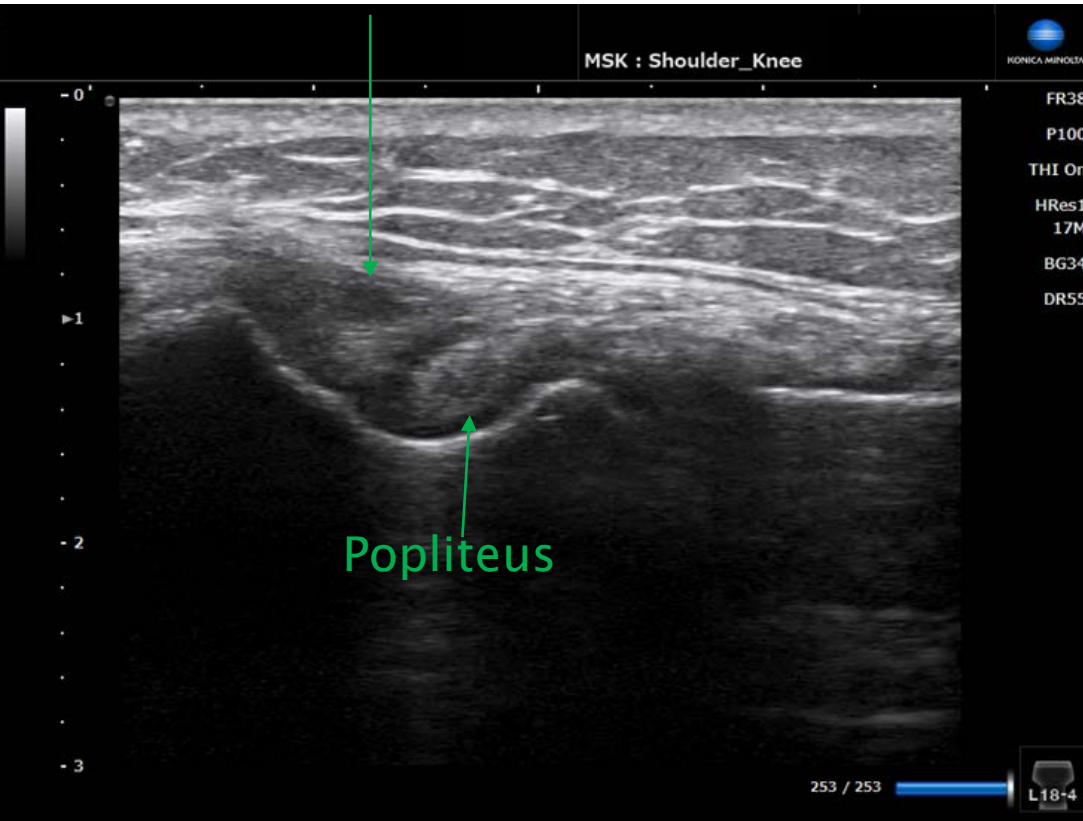

Lateral: Iliotibial track distal

Iliotibial Track

Lateral: Popliteus and fibular collateral ligament aka lateral collateral ligament (LCL)

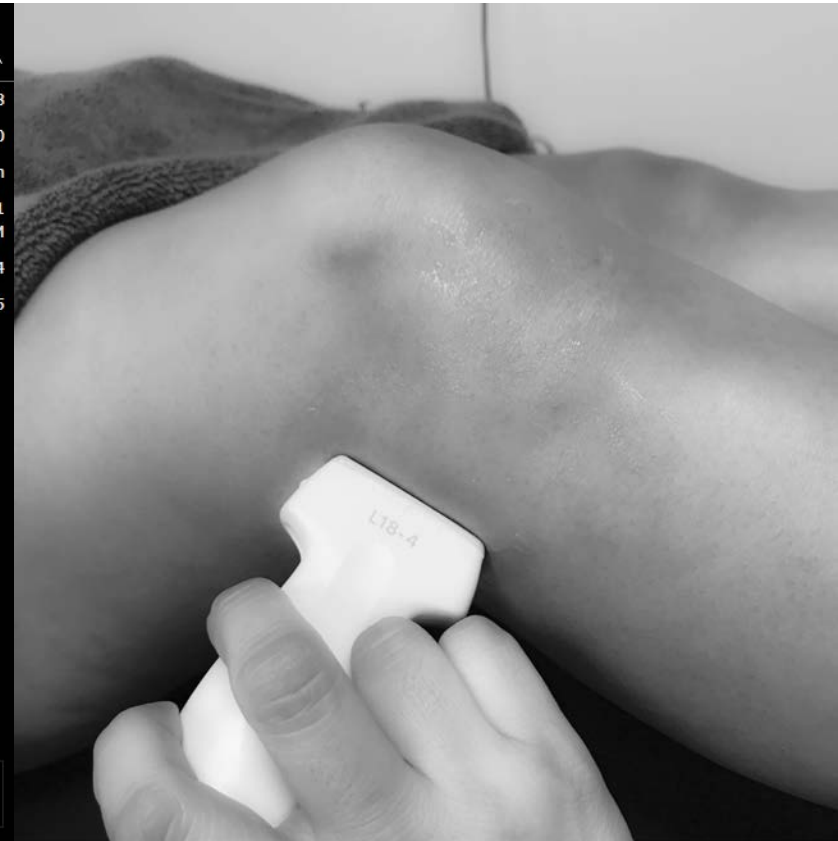

Lateral Collateral Ligament

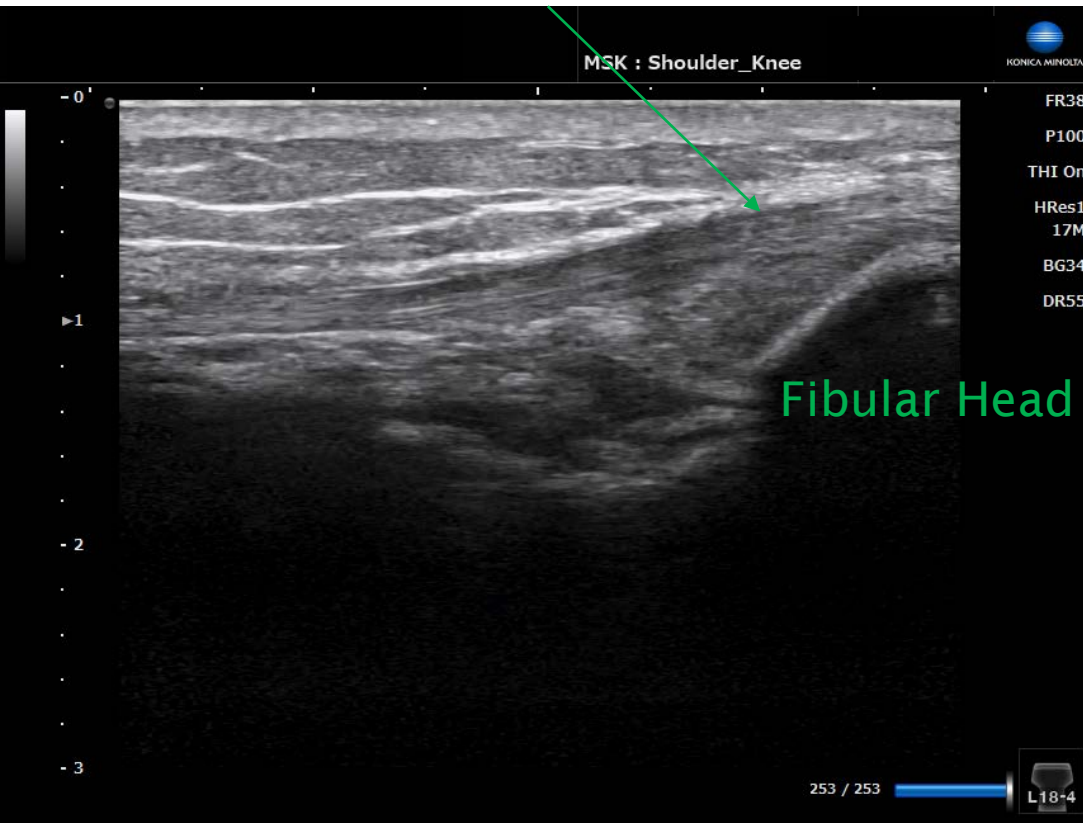

Lateral: Lateral collateral ligament

Lateral Collateral Ligament

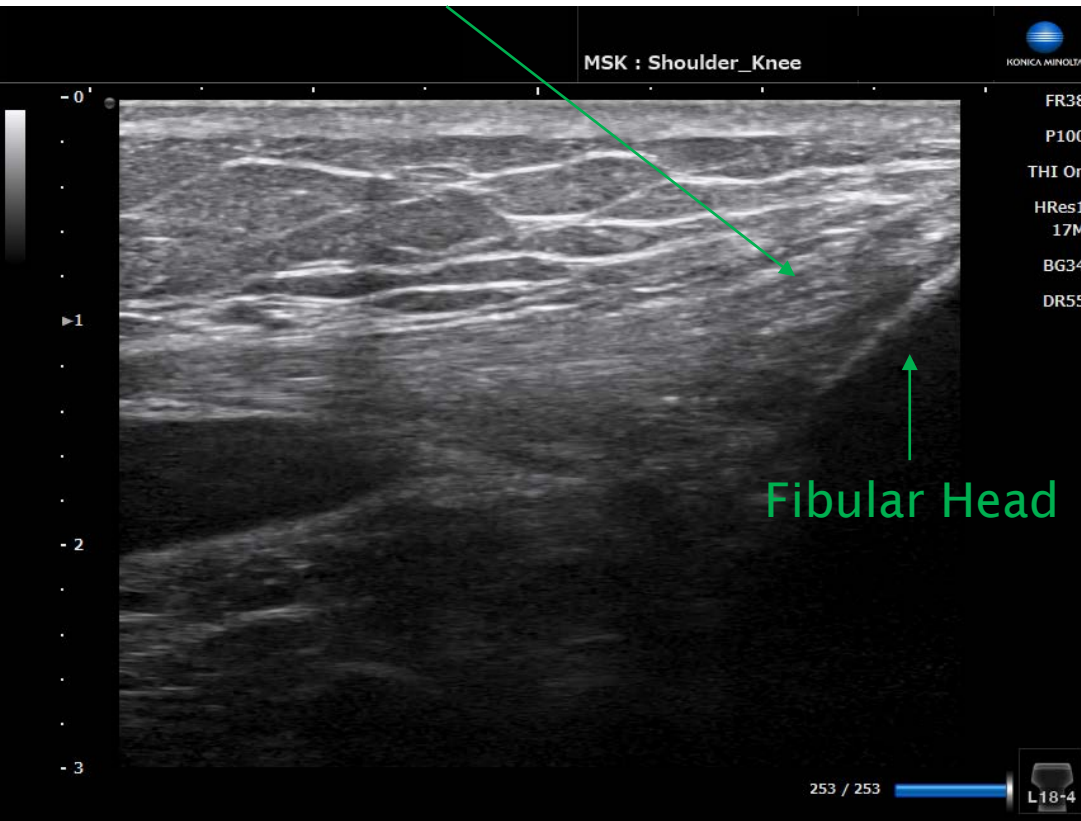

Lateral: Lateral collateral ligament

LCL Inserts On Fibular Head

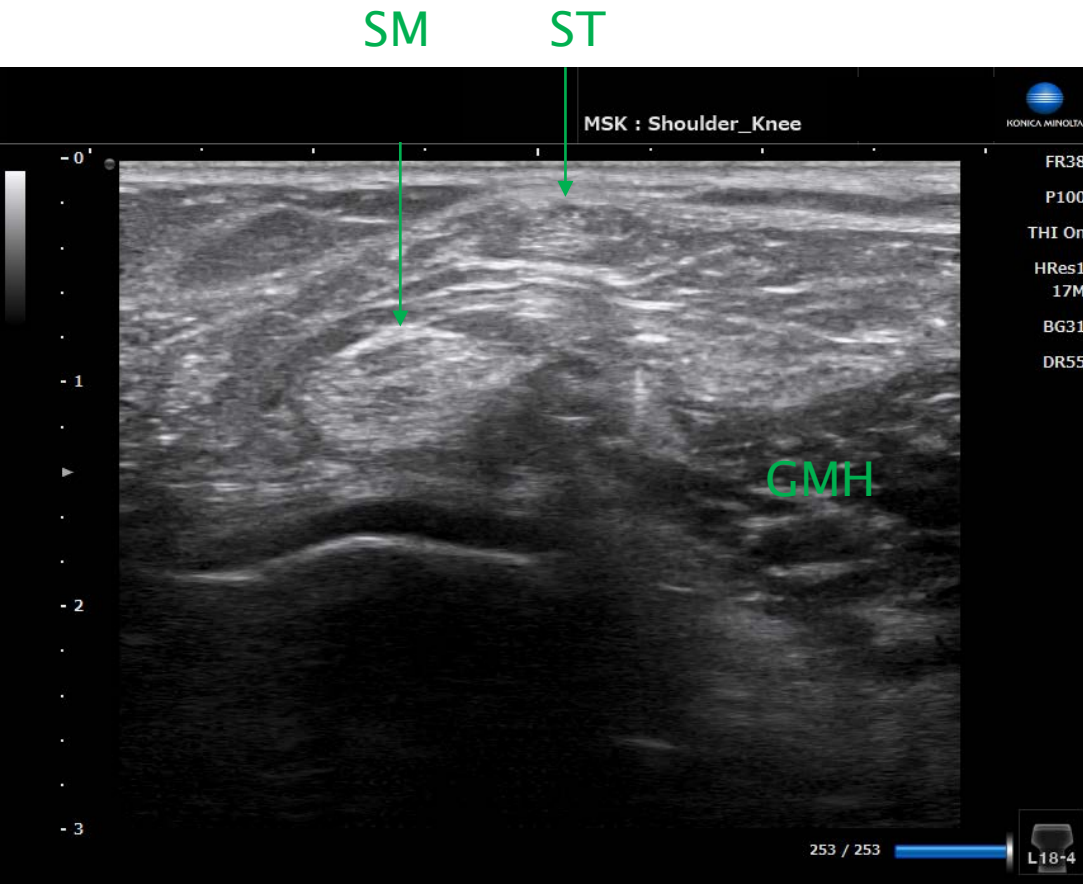

Lateral: Biceps femoris short head tendon

Biceps Femoris Short Head Tendon

Posterior: Semimembranosus (SM), semitendinosus (ST) and gastrocnemius medial head (GMH)

Posterior: Medial meniscus posterior horn

Medial Meniscus

Posterior: Posterior cruciate ligament (PCL)

PCL
